

Cloudflare's innovative approach to FedRAMP authorization

Cloudflare delivers maximum capability to the government

As the Federal government intensifies modernization and efficiency goals, agencies are driving demand for cloud services that increase capability, improve security, and reduce costs. And since these cloud services process government data, FedRAMP authorization is a must.

However, some cloud providers shortcut the FedRAMP process by offering the government scaled-down versions of their enterprise solutions. That leaves you short on capability just when you need it the most.

Get every service in every location

At Cloudflare, the Federal government is a top priority, so we offer all of our capabilities throughout our FedRAMP boundary as well.

Our approach is unique because we built the critical controls for FedRAMP authorization into our platform from the very beginning. Then we deployed our secure software consistently across our entire global network.

For your agency, this means every Cloudflare innovation is ready to serve your mission now. And future innovations arrive at the same time for both Federal and enterprise customers.

Global network expansion to accelerate your mission

Cloudflare's global network is one of the fastest on the planet, with direct connections to nearly every Internet service provider and cloud service provider. We run our own backbone to bring you closer to your users, operating in 335+ cities in 125+ countries, reaching about 95% of the world's population within about 50ms.

But we aren't standing still. We're adding **8 international data centers** and **4 new US data centers** to our FedRAMP boundary to protect, connect, and accelerate your mission both within the United State and around the world.

FedRAMP Moderate authorized and committed to High

Innovation everywhere

Our [single-platform approach](#) ensures every innovation is available in every location, including our FedRAMP data centers

Agility always

We're deploying tomorrow's requirements today like [post-quantum cryptography](#) to secure your mission today – and tomorrow

Continuous investment

We're [expanding our FedRAMP locations](#) both within the US and internationally to strengthen security and performance around the globe

Next step: FedRAMP High

We [announced our intent](#) to pursue FedRAMP High as part of our long-term commitment to the Federal government

Let Cloudflare help you accomplish your top priorities

Every public sector organization is under pressure to modernize cyber security architectures, deliver trustworthy digital services, eliminate technology debt, and comply with multiple regulatory mandates. At Cloudflare, we're your trusted partner to help you accomplish all of your top priorities.

Protect

Mitigate risk with advanced security capabilities

- ⚡ Mature Zero Trust architectures
- ⚡ Stop disruptive cyber attacks
- ⚡ Achieve continuous compliance

Connect

Enhance digital service performance and resilience

- ⚡ Deliver trustworthy digital services
- ⚡ Integrate into existing ecosystems
- ⚡ Optimize networks and data centers

Accelerate

Modernize faster and boost operational efficiency

- ⚡ Innovate faster with the power of AI
- ⚡ Reduce costs and complexity
- ⚡ Eradicate legacy technologies

Are you ready to protect, connect, and accelerate your mission?
