

What's Included in the Agreement?

Cloudflare Application & Network Security Portfolio

- Web Application Firewall
- Content Delivery Network
- DDoS Protection
- Foundation DNS
- Advanced Bot Management

Whose Eligible? Authorized state or local government agencies in North Carolina, required for IT procurement, will be considered an affiliate of the end customer but only for accessing CDN, WAF, and Advanced DDoS services. These agencies must enter separate agreements with Cloudflare for any other services.

Educational Institutions: The North Carolina University System and community colleges will be considered affiliates of the end customer if a DDoS attack affects them. After resolving the incident, they must enter a separate agreement with Cloudflare.

System Benefits

- State-wide availability of Cloudflare's services provided by NCDIT for authorized state or local government agencies in North Carolina
- Contact the Cloudflare for NC team at nc@cloudflare.com

What's Included in the Agreement?

Web Application Firewall (WAF)

Comprehensive web application security. Defend against threats with expert-curated rules for proactive protection. Includes **Advanced Enterprise Bot Management** protections.

Application-Layer DDoS Protection

Defense against disruptive DDoS attacks for uninterrupted business operations.

Content Delivery Network (CDN)

Boost website performance globally with faster load times and improved user experience for business growth.

Foundation DNS

Cloudflare's advanced Authoritative DNS service with integrated security.

System Benefits
