

Cloudflare protects healthcare networks from persistent data breaches

Healthcare networks are essential for patient care. That's why ensuring the security and availability healthcare systems and networks is more important than ever—to protect patient data, comply with regulations, uphold patient trust, and defend against the costly financial and reputational damage of cyber attacks.

Protect patient data

Maintain regulatory compliance

Ensure security and availability of healthcare systems

Mitigate financial and reputational consequences

Secure the healthcare systems and networks

Safeguard patients, providers, partners, and staff

EXPANDING ATTACK SURFACE

45%

of healthcare support employees work remotely either part- or full-time¹

RISING BREACHES

186 million

healthcare records were compromised across 677 incidents in the US in 2024²

ESCALATING THIRD PARTY RISKS

41%

of 2024 third party breaches affected healthcare organizations³

NEGATIVE IMPACT ON PATIENT CARE

74%

of hospitals believe a cyberattack interferes with patient care⁴

Cloudflare's connectivity cloud unifies protections across people, apps, APIs, data, and networks

Protect against malware and ransomware

Ensure that healthcare IT systems and data are always available, reliable, and trusted.

Mitigate third-party data breaches

Secure third-party access with a global network that ensures consistent compliance controls across any location or environment.

Enable secure application access for telehealth and remote care

Modernize remote access security and make it easier to connect on any device in any location while applying a Zero Trust policy for Internet and application access.

Prevent attacks from hurting patient-facing apps

Consolidate cloud-based web application and API protection (WAAP) on the backbone of one of the world's fastest, largest networks and Cloudflare's comprehensive application security Portfolio.

"Cloudflare's ease of use, automated updates, and automated threat protection save us time and manpower while allowing us to maintain a high level of cybersecurity against threats that could harm our patients and our business."

Wisut Ua-Anant,
Chief Digital MarTech Officer
Bumrungrad International Hospital

"Women deserve the right to track their health with confidence. It is the responsibility of every women's health app to commit to high privacy and security standards, and thanks to Cloudflare's suite of products, we are able to offer a deeper level of protection for our users' data."

Roman Bugaev, CTO
Flo Health

"CI-ISAC Australia is all about driving operational outcomes, something that we're teaming up with our partners at Cloudflare to help us deliver to a key segment of the Australian Health Sector." For example, Cloudflare "reduce[s] risk against crippling Internet threats by preventing staff from accessing harmful or inappropriate Internet content, like ransomware or phishing sites."

CI-ISAC Australia

The benefits of a unified platform to secure and assure digital healthcare operations

Cost savings

Consolidate critical security and connectivity services to improve agility and lower IT costs

Better threat intelligence

Block more threats with Cloudflare intelligence gleaned from blocking ~227 billion threats daily

Hybrid compatibility

Manage security and networking for complex environments (whether on-prem, hybrid cloud, or multicloud) from a single control plane

238% ROI with payback in less than six months

29% improvement in security team efficiency due to stronger protection, consolidated services, faster incident response, and centralized visibility

Up to 25% reduced risk of breach due to Cloudflare identifying and better protecting many attack surfaces

Modernize healthcare security and ensure service availability with Cloudflare's connectivity cloud.
